## Smoking should not be banned

Smoking should not be banned. I know smoking is bad, but I think people smoke to relieve stress. Like liquors, it will be okay to smoke sometimes. Instead of banned smoking, we should make people who smoke learn smoking is very bad and make them not want to smoke again.

The tobacco addicts can't control themselves. So we can't stop them smoking by law. They will find a way to smoke. I think if they receive psychotherapy, they will be better off. They might smoke when they are sad. This is just when children play games to relieve stress. Adults drink or smoke sometimes to relieve their stress. But if they really want to smoke, then send them to somewhere that the smoke can't harm other people. We should not ban smoking but help them stop smoking by realizing that smoking is bad and can harm the people they love, too. 🎧

## Where did all my pocket money go?

Nowadays, a claw machine is a big hit. Many students enjoy this machine; even adults in their 40s and 50s play it often. In addition, there are various kinds of characters such as Larva and Jibangi that many people love.

These machines are seen anywhere around us. So, many students can play it after school hours. Therefore, students can spend their allowance by playing this machine. Since all the dolls inside the machine are very cute, it makes teenagers try it repeatedly.

This game is not easy to master and catch a doll. The strength of the claw which picks up the doll is very weak, and it is hard to grab a doll at once. This makes people use more and more money because they just cannot give up.

Then, many students waste too much money very easily. This is a serious social problem. Using too much money on these games can lead students into gambling. Also, this makes habits of wasting money on things. Some kids even use more than 30,000 won at once to play this. This is bad because students work hard to earn by running an errand or they use up all the pocket money they received from their relatives. They do not think carefully how much that money is valuable.

Claw machines can be a fun machine for entertainment, but it can also be a dangerous machine which can lead to addiction, and make bad habits like wasting money. Teenagers have to know how precious money is. So when you try it, you have to forget about it after trying it once. Also, to stop teenagers from using these claw machines, they need teachers, parents, and other adults' advice. 🎧
